

Guarantee:

Opticron Scale Loupes are of a very high quality both in their performance and construction. We guarantee some parts in these instruments for up to 5 years under the following conditions:

- (i) In the case of defects attributable to faulty processing or materials, we will assume responsibility for the labour and material costs during the first 2 years after purchase. We reserve the right to decide whether defective parts should be repaired or replaced.
- (ii) During the next 3 years we will assume responsibility for material costs only, charging corresponding labour costs.
- (iii) We will accept no liability for damage caused by incorrect use, water penetration, or for any repairs or actions which have been carried out outside our firm.

This guarantee is in addition and does not affect your statutory rights.

51207 Scale Loupe 7x
User Guide and Guarantee

The 51207 scale loupe is designed for a number of specialist applications where quick and accurate measurements of small distances are required. Assembled using fully coated optical glass lenses, the loupe provides a bright, sharp and high contrast image important for accurate examination. The long eyerelief design means the instrument can be used effectively with or without spectacles.

Specifications:

Magnification: 7x

Lens diameter: 25mm

Lens: 4 elements, 4 lenses (fully coated)

Eyerelief: 12mm

Height: 57mm

Weight: 90g

Scale size: 33mm \varnothing

Supplied in soft case

Instructions

- (1) Place the loupe over the object to be viewed and rotate the focusing ring until the image is sharp.
- (2) Measurements are taken by reading the scale when the object is in focus.

Scale Pattern

Lengths can be measured in either inches or millimetres to a maximum of 0.6" or 16mm
