

**Specifications:** (UTA fitted with 40947 connector)

Height: **76mm** Diameter: **46mm** Weight: **110g**

(varies slightly for other connection rings)

### **Guarantee:**

Opticron 2.5x Tele-Adapters are of a very high quality both in their performance and construction. We guarantee some parts in these instruments for up to 10 years under the following conditions:

- (i) In the case of defects attributable to faulty processing or materials, we will assume responsibility for the labour and material costs during the first 5 years after purchase. We reserve the right to decide whether defective parts should be repaired or replaced.
- (ii) During the next 5 years we will assume responsibility for material costs only, charging corresponding labour costs.
- (iii) We will accept no liability for damage caused by incorrect use, water penetration - unless the equipment is specified to be waterproof, or for any repairs or actions which have been carried out outside our firm.
- (iv) Parts such as carrying straps, rubber eyecups, rubberised coatings etc. are excluded from the guarantee.

This guarantee is in addition and does not affect your statutory rights.

## 40940 2.5x Tele-Adapter

The Opticron Universal Tele-Adapter enables you to increase the magnification of your Opticron binocular or telescope+eyepiece combination by a factor of 2.5x. Easily fitted to a binocular, the UTA converts one half of the instrument into a higher powered long eyerelief monocular. The UTA also connects to Opticron SDL, HDF and HR eyepieces.

Designed with a 'B' specification eyepiece for use with or without spectacles and using a twist type retractable eyecup assembly, the UTA can be used with a wide range of binoculars with different eyepiece diameters as it is supplied as two separate components:

- (i) 2.5x adapter complete with lens assembly
- (ii) connection ring to push fit over eyepiece

To connect simply screw parts (i) and (ii) together and push over chosen eyepiece. Pull off to remove.
