Opticron telescopes are of a very high quality both in their performance and construction. We guarantee some parts in these instruments for up to 30 years under the following conditions:

- (i) In the case of defects attributable to faulty processing or materials, we will assume responsibility for the labour and material costs during the first 10 years after purchase. We reserve the right to decide whether defective parts should be repaired or replaced.

- (ii) During the next 20 years we will assume responsibility for material costs only, charging corresponding labour costs.
- (iii) We will accept no liability for damage caused by incorrect use, water penetration - unless the telescope is specified to be waterproof, or for any repairs or actions which have been carried out outside our firm.
- (iv) Rubberised coverings are excluded from the guarantee.

This guarantee is in addition and does not affect your statutory rights.

Registration

If you would like to register your purchase with us please complete the online Product Registration Form at www.opticron.co.uk/Forms/registration_form.htm

Alternatively please telephone us during normal working hours on the numbers given. We will need the product name and serial number (if applicable), purchase date and outlet, your name and postcode.

Registration is voluntary and failure to register will not diminish your rights under the guarantee.

Privacy
Opticron takes your privacy seriously and we do not share personal information with other companies.

Telescopes
User Instructions and
30 Year Guarantee

User Instructions

Your telescope will open up a whole range of new and exciting impressions, whether for general use or specialist study. To get the sharpest picture turn the focus wheel slowly until the image being viewed becomes sharp. To minimise image shake caused by high magnification the instrument should be supported using a suitable tripod or mount connected via the tripod socket. The retractable lens hood (if fitted) should be extended when viewing in bright sunlight.

Wearing glasses. Many Opticron eyepieces are designed to offer you the full field of view when wearing glasses. The rubber eyecup fitted to these eyepieces is designed to position your eye correctly to get the maximum comfortable field of view with or without glasses. If the eyepiece has a fold down or retractable eyecup it should be used in the 'down' position when viewing with glasses. Doing this will ensure the maximum available field of view is obtained. Be sure to return the eyecup to the 'up' position if you or anybody else wants to view without glasses.

Care and cleaning. Telescopes require little maintenance but occasionally the outside surfaces of the eyepiece and objective lens will need cleaning. To avoid damaging these surfaces please read the following carefully.

- (i) Gently remove excess dirt and dust using a compressed air device or blower brush. **Caution:** Hard and persistent rubbing of dirty surfaces can cause abrasive scratches on the surface of the glass which may distort viewing.
- (ii) Breathe on exposed glass surface and then wipe with an optical cleaning cloth (code 30277) in a circular motion until the surface is clean again.

Do not attempt to dismantle the instrument as this will invalidate the guarantee.
For extra protection, store the instrument in the gift box or one of the optional cases available.

WARNING. Never under any circumstances use a telescope to view the sun. Doing so will cause serious damage to your eyes.

We hope you will get a great deal of pleasure from your new Opticron telescope. If you have any problems or damage the instrument in any way our Service Department is on hand to help you.
